Disc ploughs are used in tillage on dry cultivated or fallow land, manure land, wheat and rice stubble fields. It has the characteristics of small resistance and easy operation etc.

The series of suspended Disc harrows are mainly used for cleaning away stubble of plants before cultivation, or crushing clods after cultivation on uncultivated land and in sticky heavy clay soil field. They can also be used as a plough for primary tillage in dry cultivated fields.

The series of ploughs are suitable for the sandy loam, loam, clay soil or paddy field. After cultivation, the land surface is leveling, the soil clods is well broken, then the organic fertilizer deeply under the earth, fertilizing the soil. The products are suitable to different model tractors all over the world.
